## ONE CLEAR FOCUS

Fordia's goal is simple - to develop and distribute the best diamond tools, equipment and accessories to small and large businesses specializing in core drilling for the mineral exploration and geotechnical industries.

That is our mission. How we live it is our strength. We provide exceptional service, demonstrated daily by our worldwide representatives. Our distribution network ensures Fordia products can be delivered globally, right on schedule. We are highly committed to quality and innovation.

Luc Paquet

Denis Landry  
Executive VP & General Manager

## OUR COMMITMENT TO TOTAL QUALITY

Fordia has always been at the forefront of excellence in the mining industry.

At Fordia, quality means providing products and services on time that comply with our customers' specific requirements at competitive prices. To achieve this, every employee strives to reach this level of quality the first time and at all times.

This commitment to excellence requires processes that ensure our manufacturing methods, business management, employee training and product development all foster quality and continuous improvement.

In order to uphold our dedication to total quality, Fordia continuously invests in the development of its management system and ensures all employees are involved in maintaining quality.

**At Fordia, quality is a commitment.**

© Mathieu Drouin

Canotons-de-Jest, Qc, Canada, 2007

“Because a helmet and a pair of goggles are essential to protect a drill site’s true resource and because getting the right wrench may have an impact on productivity, we believe that accessories are just as important as any other tool or equipment. Fordia provides all needed accessories to suit the most precise needs – because every detail counts.”

## ACCESSORIES

TABLE OF CONTENTS

SPILL KITS	8-9	WRENCHES	18-21
SORBENTS	10-11	RECOVERY TOOLS	22-23
HOSES, CABLES, OVAL SLEEVES & PLIERS	12-13	CARBIDE GRIPPERS	24
CORE BOXES & DIAMOND BLADES	16-17	GRAPHITE PLUGS & VAN RUTH PLUGS	26-27

SPILL KITS

No matter how professional a drilling team is, spills can occur at any time. And when a spill happens, reacting quickly with the right absorbents and accessories helps prevent environmental damages. Fordia offers 12, 30 or 65 gallon spill kits that contain essential emergency material needed to control oil leaks and critical situations.

12 GALLON DRUM  
Sorbent Capacity = 9 gallons

- 10 Pads (15" x 19")
- 1 Sock (3" x 4')
- 2 Socks (3" x 8')
- 2 Bags of Cellulose
- 3 Disposable Bags w/ Ties
- 1 Emergency Response Guidebook
- 1 Pair of Nitrile Gloves

12 Gallon Drum  
Part No. 65-002

30 GALLON DRUM  
Sorbent Capacity = 18 gallons

- 25 Pads (15" x 19")
- 4 Socks (3" x 4')
- 4 Socks (3" x 12')
- 4 Pillows (18" x 24")
- 3 Disposable Bags w/ Ties
- 1 Emergency Response Guidebook
- 1 Pair of Nitrile Gloves

30 Gallon Drum  
Part No. 65-004

65 GALLON DRUM  
Sorbent Capacity = 46 gallons

- 50 Pads (15" x 19")
- 10 Socks (3" x 4')
- 5 Socks (3" x 12')
- 6 Pillows (18" x 24")
- 3 Disposable Bags w/ Ties
- 1 Emergency Response Guidebook
- 1 Pair of Nitrile Gloves

65 Gallon Drum  
Part No. 65-005

OIL ONLY PADS & ROLLS (BONDED MELTBLOWN)

Meant to absorb oil spills quickly, these durable pads and rolls are formed by bonding two layers of standard meltblown polypropylene. This creates a higher surface area, which enables pads and rolls to soak up liquid quickly. Bonding also adds increased strength and lowers the risk of fibres linting during use. They help provide a cleaner and safer working environment.

Oil Only Pads  
Part No. 65-010  
Oil Only Rolls  
Part No. 65-011

SORBENT SOCKS (UNIVERSAL CELLULOSE)

Having performing sorbent socks on hand is a simple yet very efficient way to limit leaks as well as their consequences. Fordia offers highly absorbent universal cellulose sorbent socks that are great for all-purpose maintenance. These socks are suitable for most applications, but not intended for aggressive fluids.

Sorbent Socks  
Part No. 65-006

ALL-AROUND SORBENTS (AIRLAID POLYPROPYLENE)

Absorbents of all types exist to limit oil leaks on drill sites, but this is one versatile sorbent. Made from recycled polypropylene bonded between two layers of spunbond fabric, these high-strength airlaid sorbents are stronger and more absorbent than traditional sorbents. They can easily fold in three to make a sock and are pliable enough to use as a wipe.

All-Around Sorbents  
Part No. 65-012

REGULAR HOSES

Fordia’s hoses are meant to last, with abrasion and weather-resistant EPDM rubber cover. They are also meant to perform, with limited oil-resistant EPDM rubber tube reinforced with high-tensile spiralled yarn. Available in 100 foot lengths, these 1” ID hoses offer 200psi working pressure and are usually mounted with a universal Chicago coupling.

Regular Hoses  
Part No. 62-015

LAY FLAT HOSES

Lay flat hoses offer 200psi working pressure, just as regular hoses. However, they are much lighter and therefore, are easier to manipulate. They also take a lot less storage space during transportation and they resist rodent bites for greater durability.

Lay Flat Hoses  
Part No. 62-016

CABLES

As it is such a critical link to get to the core, cable ought to be reliable and wear resistant. Whether you need swaged or armored cable, Fordia distributes standard 3/16” cable, available in bundles of up to 6,000 feet.

IMPERIAL	METRIC	PART NO.
ARMORED		
3/16" X 500'	5mm X 152m	68A-316-05
3/16" X 1000'	5mm X 305m	68A-316-10
3/16" X 1500'	5mm X 457m	68A-316-15

OVAL SLEEVES & PLIERS

Oval sleeves are a simple yet efficient way to make a neat and strong eye splice or to terminate wire rope in a matter of seconds. Fordia has in stock standard oval sleeves in copper (3/16”, ¼” and 5/16”) or aluminium (3/16”) as well as corresponding pliers for more convenience.

PLIERS 1/4"	69-005

GREY SQUIRREL PLASTIC CORE BOXES

Fordia’s Grey Squirrel plastic core boxes cost about the same per meter as wood core boxes but offer an overall greater lifespan, as they are heat-resistant and aren’t damaged by metal wires. Furthermore, plastic core boxes are light, and therefore, easier to carry and stack.

Grey Squirrel Plastic Core Boxes  
BWL Part No. 60-078  
NWL Part No. 60-079  
HWL Part No. 60-080

WOOD CORE BOXES

Wood core boxes have been used throughout the industry for decades, as they are much more resistant than cardboard core boxes. They can be reused over and over since their robust material ensures great durability

Wood Core Boxes  
BWL Part No. 60-081  
NWL Part No. 60-082  
HWL Part No. 60-083  
PWL Part No. 60-084

WAXED CARDBOARD CORE BOXES

In addition to being truly economical, waxed cardboard core boxes are foldable and take very little space, which facilitates their transport and storage.

Waxed Cardboard Core Boxes  
Part No. 60-085  
(BWL, NWL and HWL)

DIAMOND BLADES

Fordia offers segmented saw blades that cut core easily when used with any handheld, high-speed gas or electric saw. These blades use fusion-welded technology for an ultimate bonding between segment and steel core. Different matrices are available, providing the right combination of speed, life and value, in 12”, 14” or 16” diameters.

OWL INNER & OUTER TUBE WRENCHES

Tighten or loosen joints efficiently with sturdy and reliable OWL inner and outer tube wrenches that deliver great lifespan. Reinforced with either particles or gripper pads, these tools have all that is needed to get a consistent grip on rods and casing. Fordia has in stock all standard wrench sizes, in both options.

RIDGID™ STRAIGHT PIPE WRENCHES

Fordia has all the straight pipe wrenches needed to operate a drill site. Whether it is a heavy-duty cast-iron or 40% lighter aluminium I-beam handle, these wrenches come with a full floating forged hook jaw and easy spin, knurled adjustment nut for quick one-handed operation; they offer the performance expected from any RIDGID™ tool. RIDGID™ tools have a lifetime warranty and all needed spare parts are available in stock.

RECOVERY TOOLS

Recovery tools such as wireline rod taps, wireline rod full grip taps and wireline casing taps are quite handy when it comes to bringing a string of lost rods or casing back to the surface. Fordia has all standard recovery tools, whether right or left hand taps, in stock.
